12 CE's provided (LMHC, LMFT, LCSW)

Tracking # 20-430079

Learning Objectives:

Following this workshop, the participant will be able to:

1. Understand how DBT for substance abusers is similar to and different from other major substance abuse treatments.
2. Understand outcomes from the research consisting of randomized controlled trials of DBT for substance abusers.
3. Utilize the concept of Dialectical Abstinence; a synthesis of absolute abstinence and harm reduction.
4. Apply specific treatment targets for substance abusers with BPD.
5. Apply specific attachment strategies to engage reluctant clients to treatment.
6. Apply specific DBT skills added and modified for use with substance abusers with BPD
